BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images may include (but are not limited to):

- BLACK BORDERS
- TEXT CUT OFF AT TOP, BOTTOM OR SIDES
- FADED TEXT
- ILLEGIBLE TEXT
- SKEWED/SLANTED IMAGES
- COLORED PHOTOS
- BLACK OR VERY BLACK AND WHITE DARK PHOTOS
- GRAY SCALE DOCUMENTS

IMAGES ARE BEST AVAILABLE COPY.

**As rescanning documents *will not* correct images,
please do not report the images to the
Image Problem Mailbox.**

CLAIMS:

1. A method for controlling information gathered by data collection agencies in an electronic transaction comprising the steps of:

selecting a persona facet by a user, wherein said persona facet selected comprises a user selectable information that will be exposed in said electronic transaction;

connecting to a web site by a web browser;

sending said selected persona facet to said web site by said web browser during said electronic transaction;

receiving information about said user stored in a database from said web site if said web site recognizes said persona facet; and

updating said information about said user stored in said database.

2. The method as recited in claim 1 further comprising the step of:

comparing said user selectable information in said persona facet with said received information from said web site.

3. The method as recited in claim 2, wherein said comparing said user selectable information in said persona facet with said received information from said web site comprises the step of parsing said information received from said web site.

4. The method as recited in claim 1, wherein said web site determines if said web site recognizes said persona facet by searching a database for said persona facet.

5. The method as recited in claim 2, wherein if there are differences between said information received from said web site and said user selectable information in said persona facet from said comparison then said information about said user stored in said database is updated.

6. The method as recited in claim 1 further comprising the step of:

2 completing said electronic transaction.

1 7. The method as recited in claim 1, wherein said user selectable information
2 comprises at least one of the following: user name, electronic mail address, public key,
3 private key, unique key, payment method, and customer resource data.

1 8. The method as recited in claim 6, wherein said user selectable information
2 comprises a particular payment method.

1 9. The method as recited in claim 8, wherein said electronic transaction is completed
2 by initiating a method call to said web site from said web browser to expose said
3 particular payment method.

1 10. The method as recited in claim 1 further comprising the step of:
2 determining whether said selected persona facet is recognized by said web site,
3 wherein if said web site does not recognize said selected persona facet then said user
4 selectable information is stored in cookie data.

1 11. The method as recited in claim 1 further comprising the step of:
2 determining whether said selected persona facet is recognized by said web site,
3 wherein if said web site recognizes said selected persona facet then said user requests
4 from said web site to send said information about said user stored in said database.

1 12. The method as recited in claim 11, wherein if said web site does not send said
2 information about said user stored in said database then the method further comprises the
3 step of:

4 storing said user selectable information in cookie data.

1 13. A computer program product having computer readable medium having computer
2 program logic recorded thereon for controlling information gathered by data collection
3 agencies in an electronic transaction, comprising:

4 programming operable for selecting a persona facet by a user, wherein said
5 persona facet selected comprises a user selectable information that will be exposed in
6 said electronic transaction;

7 programming operable for connecting to a web site by a web browser;

8 programming operable for sending said selected persona facet to said web site by
9 said web browser during said electronic transaction;

10 programming operable for receiving information about said user stored in a
11 database from said web site if said web site recognizes said persona facet; and

12 programming operable for updating said information about said user stored in
13 said database.

14. The computer program product as recited in claim 13 further comprises:

15 programming operable for comparing said user selectable information in said
16 persona facet with said received information from said web site.

17. The computer program product as recited in claim 14, wherein said comparing
18 said user selectable information in said persona facet with said received information from
19 said web site comprises:

20 programming operable for parsing said information received from said web site.

21 16. The computer program product as recited in claim 13, wherein said web site
22 determines if said web site recognizes said persona facet by searching a database for said
23 persona facet.

24 17. The computer program product as recited in claim 14, wherein if there are
25 differences between said information received from said web site and said user selectable
26 information in said persona facet from said comparison then said information about said
27 user stored in said database is updated.

1 18. The computer program product as recited in claim 13 further comprises:
2 programming operable for completing said electronic transaction.

1 19. The computer program product as recited in claim 13, wherein said user
2 selectable information comprises at least one of the following: user name, electronic mail
3 address, public key, private key, unique key, payment method, and customer resource
4 data.

1 20. The computer program product as recited in claim 18, wherein said user
2 selectable information comprises a particular payment method.

1 21. The computer program product as recited in claim 20, wherein said electronic
2 transaction is completed by initiating a method call to said web site from said web
3 browser to expose said particular payment method.

1 22. The computer program product as recited in claim 13 further comprises:
2 programming operable for determining whether said selected persona facet is
3 recognized by said web site, wherein if said web site does not recognize said selected
4 persona facet then said user selectable information is stored in cookie data.

1 23. The computer program product as recited in claim 13 further comprises:
2 programming operable for determining whether said selected persona facet is
3 recognized by said web site, wherein if said web site recognizes said selected persona
4 facet then said user requests from said web site to send said information about said user
5 stored in said database.

1 24. The computer program product as recited in claim 23, wherein if said web site
2 does not send said information about said user stored in said database then the computer
3 program product further comprises:
4 programming operable for storing said user selectable information in cookie data.

- 1 25. A system comprising:
2 a web server; and
3 a client coupled to said web server, wherein said client comprises:
4 a processor;
5 a memory unit operable for storing a computer program operable for
6 controlling information gathered by data collection agencies in an electronic transaction;
7 and
8 a bus system coupling the processor to the memory, wherein the computer
9 program is operable for performing the following programming steps:
10 selecting a persona facet by a user, wherein said persona facet
11 selected comprises a user selectable information that will be exposed in said electronic
12 transaction;
13 connecting to a web site by a web browser;
14 sending said selected persona facet to said web site by said web
15 browser during said electronic transaction;
16 receiving information about said user stored in a database from
17 said web site if said web site recognizes said persona facet; and
18 updating said information about said user stored in said database.
19
20
21
22
23
24
25
26. The system as recited in claim 25, wherein the computer program is further
operable to perform the programming step:
27 comparing said user selectable information in said persona facet with said
28 received information from said web site.

1 28 The system as recited in claim 25, wherein said web site determines if said web
2 site recognizes said persona facet by searching a database for said persona facet.

1 29. The system as recited in claim 26, wherein if there are differences between said
2 information received from said web site and said user selectable information in said
3 persona facet from said comparison then said information about said user stored in said
4 database is updated.

1 30. The system as recited in claim 25, wherein the computer program product is
2 further operable to perform the programming step:
3 completing said electronic transaction.

1 31. The system as recited in claim 25, wherein said user selectable information
2 comprises at least one of the following: user name, electronic mail address, public key,
3 private key, unique key, payment method, and customer resource data.

1 32. The system as recited in claim 30, wherein said user selectable information
2 comprises a particular payment method.

1 33. The system as recited in claim 32, wherein said electronic transaction is
2 completed by initiating a method call to said web site from said web browser to expose
3 said particular payment method.

1 34. The system as recited in claim 25, wherein the computer program is further
2 operable to perform the programming step:
3 determining whether said selected persona facet is recognized by said web site,
4 wherein if said web site does not recognize said selected persona facet then said user
5 selectable information is stored in cookie data.

1 35. The system as recited in claim 25, wherein the computer program is further
2 operable to perform the programming step:

1 determining whether said selected persona facet is recognized by said web site,
2 wherein if said web site recognizes said selected persona facet then said user requests
3 from said web site to send said information about said user stored in said database.

1 36. The system as recited in claim 35, wherein if said web site does not send said
2 information about said user stored in said database then the computer program is further
3 operable to perform the programming step:

4 storing said user selectable information in cookie data.
